

Product: c25

c25 Hemispheric Indoor Camera

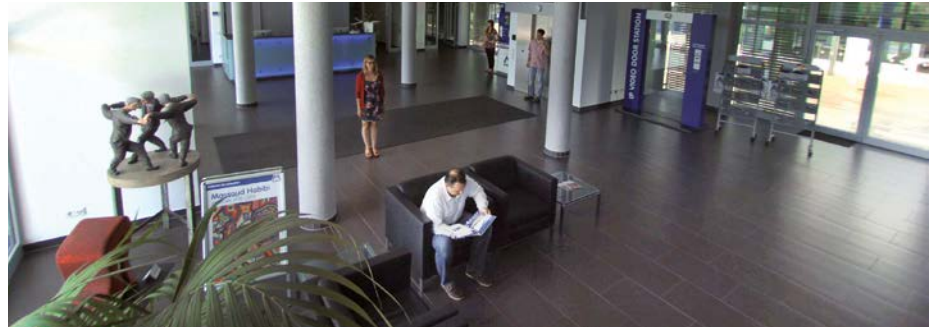

Perfect Overview • Discrete • Video Analysis

MOBOTIX

Optional video analysis MxAnalytics

Corrected view with 103° (B036) premium lens

Perfect Overview without Blind Spots

The new 6MP c25 is perfect to create a discrete and appealing interior video solution to cover a complete room from wall to wall without any blind spots. In combination with the corner mount and 103° premium lens, the horizontal opening angle delivers enough flexibility to cover an interior room situation with highest resolution details.

The corner mount is easily installed on three fixation points and supports the c25 mounting without any tools thanks to the innovative click-in mechanism.

Competitive without Compromise

The c25 is very competitive and at the same time supports all MOBOTIX functions. The customer gets a complete standalone video surveillance system, including SD card, NAS event recording, alarming, professional video management (VMS) and optional video analysis functions with heat map, object statistics and behavioral detection. Further highlights are the integrated hemispheric technology and the new 103° lens to cover

a complete room without any blind spots. The integrated motion analysis MxActivity-Sensor helps to drastically reduce any false alarms.

All indoor cameras are available with product options such as complete two-way audio, including microphone and loudspeaker. This system offering is easy to expand and perfect for small offices and shops, retail stores, hotels and restaurants, museums, health care, universities and schools. An optional expansion board can be plugged on the backside of the camera to realize additional IO- and alarm functions.

Corrected corner view with 103° (B036) premium lens

Easiest Installation

The 6MP indoor models c25 and p25 are easily installed within minutes in suspended ceilings like a halogen downlight. All indoor models are supported with on-wall kits to cope with all surfaces.
